PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on experience developing enterprise and full-stack applications using C#, ASP.NET, REST APIs, Oracle Database, and secure authentication/authorization workflows. Experienced in SAP integration using SAP NCo and SAP BAPIs, LDAP authentication, role-based access control, and database-driven applications. Strong foundation in OOP, Data Structures & Algorithms, DBMS, and software engineering.

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, SQL
.NET & Backend: ASP.NET, Flask, REST APIs
Frontend: HTML5, CSS3, JavaScript, Bootstrap, React
Databases: Oracle Database, MySQL, SQLite
Enterprise & Security: SAP NCo, SAP BAPIs, LDAP, RBAC, Authentication, Authorization
Cloud & Tools: Azure, AWS, Git, GitHub
Concepts: OOP, Data Structures & Algorithms, DBMS, Distributed Computing

PROFESSIONAL EXPERIENCE

Rashtriya Chemicals & Fertilizers Limited — Software Developer Intern | Mumbai Jan 2026 – Feb 2026

- Developed an enterprise RBAC platform using C#, ASP.NET, Oracle Database, and SAP NCo, integrating LDAP authentication and SAP BAPI/Function Module-based role provisioning for enterprise authorization management.
- Implemented role administration, T-Code assignment, audit logging, and real-time authorization synchronization to strengthen security and access governance.

PROJECTS

Diabetic Retinopathy Detection — Hybrid ML Pipeline Aug 2025 – Mar 2026

Python, Flask, OpenCV, DenseNet121, SVM, Random Forest, KNN, SMOTE

- Owned frontend design and system integration for a hybrid diabetic-retinopathy detection pipeline (DenseNet121 + SVM/Random Forest/KNN ensemble) in a Flask web application, implementing image upload, prediction visualization, and diagnostic result presentation across 10,000+ retinal images.

GitHub: github.com/SubodhMuneshwar/dr_hybrid_project

Facial Recognition Attendance System Jan 2025 – May 2025

Python, Flask, OpenCV, SQLite, Excel

- Owned frontend, UI design, and system integration for a real-time facial-recognition attendance application, connecting OpenCV-based identity verification with a Flask/SQLite workflow and automated attendance logging.

GitHub: github.com/SubodhMuneshwar/Face_recognition

Foodies Goodies — Recipe & Diet Planning Platform Jan 2024 – Dec 2024

HTML, CSS, JavaScript, PHP, MySQL, REST API

- Built a full-stack recipe/diet platform (100+ recipes) with BMI-based meal recommendations, responsive UI, and Edamam REST API integration for search and filtering.

ACHIEVEMENTS & LEADERSHIP

- Smart India Hackathon 2024 & 2023:** Selected among 118 finalist teams nationwide (biomimicry-based grey water management) and ranked Top 5 of 258 teams nationwide (menstrual waste disposal solution).
- Student Secretary, RMCET (Aug 2024 – May 2026):** Represented 500+ students, leading event planning and academic, cultural, and technical initiatives.
- Workshop Instructor, Full Stack Web Development (Mar 2024):** Co-conducted a 5-day workshop for 50+ students; also represented college in youth festivals and volunteered with the Placement Cell.

EDUCATION & CERTIFICATIONS

B.E. in Computer Engineering — RMCET, Mumbai University | CGPI: 9.14 2022 – 2026
Higher Secondary School — Patkar Varde College | 70.17% 2020 – 2022
SSC — St. Thomas Academy | 88% 2020
